

SANUAR KHAN

FULL-STACK DEVELOPER | AI SYSTEMS BUILDER

Dhaka, Bangladesh • +880 199 451 2054 • sanuarkhan220@gmail.com
dmenu.online • LinkedIn • GitHub

PROFILE

Full-stack JavaScript developer and AI systems builder who designs, builds, and deploys production SaaS products end-to-end. Experienced with MERN, Next.js, PostgreSQL, real-time systems, AI agents, RAG pipelines, and cloud deployment. Strong product ownership with experience building solo products and collaborating with remote international teams.

CORE SKILLS

Frontend: React.js, Next.js, TanStack Query, Zustand, Redux/RTK, Tailwind CSS, Responsive Design	Backend: Node.js, Express.js, REST APIs, WebSockets, Authentication
Databases: MongoDB, PostgreSQL, Prisma ORM, NeonDB	AI & Automation: LangChain, RAG, Vector Search, Hermes Agent, Prompt Engineering, Pydantic, OpenAI / Claude / Gemini APIs
Infrastructure: Azure VMs, Docker, PM2, Cloudflare, Git/GitHub, Linux CLI, Postman	Languages: JavaScript (ES6+), Python, PHP, HTML, CSS, C

FEATURED PROJECTS

dmenu.online — Restaurant Management SaaS | Solo Founder | Live Beta

MongoDB • Express.js • React • Node.js • WebSockets

- Built a multi-tenant restaurant platform end-to-end with QR ordering, real-time Kitchen Order Tokens (KOT), POS billing, table management, and stock tracking.
- Created owner dashboards and a self-serve trial signup flow; deployed the production system using Azure VM, PM2, Cloudflare, MongoDB Atlas, Cloudinary, and Cloudflare Pages.

Facetube Automation — AI Video Automation SaaS | Solo Founder | Live

Next.js • LangChain • Groq • OpenRouter • Cloudflare Zero Trust

- Built an automated pipeline that generates faceless short-form videos from audio and publishes content to YouTube, Facebook, and Telegram.
- Designed multi-provider AI fallback chains and resolved production issues involving OAuth, webhook loops, and dynamic token budgeting.

SKode AI Operations — Agentic Workflow Architecture | Founder

Hermes Agent • LangChain • Pydantic • SerpApi

- Architected an AI agency operations layer with subagents for lead scoring, outreach writing, template stamping, and follow-up.
- Built structured JSON handoffs with Pydantic and an earlier lead-generation system that sourced 100+ restaurant leads with personalized outreach drafts.

EXPERIENCE

Full Stack Developer Intern — Itransition Group | USA • Remote | May 2025 – Jul 2025

- Completed an intensive commercial software development program focused on real-world problem solving.
- Built a Google Forms-style application using React, Node.js, Express, PostgreSQL, NeonDB, and Prisma.
- Implemented cryptographic authentication, real-time validation, and OOP programming projects with anti-cheat logic.

Lead Web Developer — Sakura Trade Ltd | Japan • Remote | Jun 2023 – Jul 2023

- Led a 4-person cross-functional team to deliver a responsive corporate website and owned the project lifecycle from architecture through deployment.

Web Designer — Shopify | Freelance • USA • Remote | Dec 2022

- Redesigned e-commerce layouts with a focus on conversion, user experience, and mobile responsiveness.

EDUCATION & CERTIFICATIONS

MA in TESOL — University of Dhaka | Postgraduate | Final Exam Completed 2026

BA in ESOL — University of Dhaka | Graduated

Diploma in MERN Stack Web Development — 1-Year Certified Programme

Commercial Software Development Intern — Itransition Group
